

Table of Contents

General Goals and Design of the Program	7
General Information for Teachers	9
Overall Rationale	9
Using this Guide	10
Homework and Further Explorations for the Students	13
Part 1 – Observing Mystery Bottles and Developing the Concept of Density .	14
Activity 1 Observing Mystery Bottles	15
Activity 2 Mixing and Experimenting with Liquids	20
Activity 3 Further Experiments with Mixing Liquids	25
Activity 4 Mixing the Liquids More Systematically	29
Activity 5 Demonstration: Ranking the Densities of the Liquids	33
Activity 6 Weighing Liquids	35
Activity 7 Identifying the Remaining Mystery Liquids by Weighing	43
Activity 8 Demonstration: Making a Lava Lamp	46
Part 2 – Investigating the Density of Balls in Liquids	51
Activity 9 Sinking and Floating Balls	52
Activity 10 Comparing the Weight of the Balls	56
Activity 11 Comparing Balls and Liquids by Weight	61
Activity 12 Comparing Balls and Liquids by Volume	66
Activity 13 A Special Student Investigation: Cartesian Divers	70
Activity 14 A Special Student Investigation: Measuring the Thickness or Viscosity of a Liquid	75
Conclusion	80
Bibliography	81
